

# Student Internship Opportunity

Are you interested in working with brand new agricultural machinery?

Do you want to be up to date with the latest improvements in the Ag industry?

Do you want to learn how field scale research is implemented and completed?

If so....

Come Join the FARE Department's Ag Operations Team

## Internship Highlights

- Operate and transport brand new Case IH machinery and equipment.
- Learn to install Precision Planting Products on various planters and combines.
- Gain mechanical knowledge of agricultural equipment (Tractors, sprayers, planters, tillage tools)
- Assist in data collection for the annual eFields publication.
- Many opportunities for overtime during planting, harvest, and data collection.
- Flexible schedule allows a day off if needed with short notification.
- Job can transfer into the academic year with extreme flexibility for class schedule.
