South County Recycled Water Pipeline Project

Luchessa Bridge Temporary Closure

Valley Water

Valley Water is constructing the South County Recycled Water Pipeline Project to enhance Gilroy's recycled water distribution system. Once completed, this new system would be able to deliver to new customers, increase the amount of recycled water delivered to existing customers, improve delivery and support future system expansion.

Starting on **July 13, 2022**, the Luchessa Bridge will temporarily close between Thomas Road and Church Street, and vehicles will be rerouted. Emergency vehicles, pedestrians, and bicyclists will have access to the bridge. The temporary bridge closure is necessary to complete the project by the end of this summer. We expect the bridge to reopen in mid-August. Thank you for your patience while we work on this infrastructure project.
