

When stored per Carlisle's recommendations, all packaging options for Carlisle's Flexible FAST Adhesive provide a shelf life of one year from its original manufacturing date. If Flexible FAST Adhesive has reached its shelf life, it should be disposed of properly by EPA Compliant standards. When selecting a company to assist in the disposal process, ensure they specialize in environmental waste management.

One recommended partner to contact is EWMI (Environmental Waste Minimization, Inc.) due to their experience with waste management and commitment to environmentally responsible solutions. Regardless of the situation, EWMI will be able to assist in the planning, pickup, transportation, and disposal of Carlisle's Flexible FAST Adhesive. EWMI tracks all waste shipments from cradle to grave with a system unique to the industry, ensuring requests reach the finish line once they have been picked up.

EWMI guarantees a quick response, and they are fully equipped to facilitate the transportation and disposal of Flexible FAST in the following packaging options:

- Dual Cartridges
- Dual Tanks
- 5-Gallon Jugs
- 15-Gallon Drums
- 50-Gallon Drums

To contact EWMI for questions or disposal setup, please call **(484) 275-6900** and ask for *Inside Sales*.
