

MARKETING ANNOUNCEMENT

Manufacturer's Representative

Flexible FAST™ Supply Update July 8, 2022

To: Carlisle SynTec Systems' Manufacturer's Representatives and Distributors

Carlisle SynTec Systems is pleased to announce that due to capacity improvements, Flexible FAST Adhesive supply has returned to normal. Due to the improved availability of Flexible FAST Adhesives, the use of non-Carlisle branded low-rise adhesives in warranted systems will no longer be allowed. Effective August 8, 2022, the use of Carlisle-branded low-rise adhesives will be required for all warranted membrane and insulation attachments.

Flexible FAST is available in all packaging types, offers industry-leading performance, can be used year-round and for both membrane and insulation attachment. The chart below outlines the approved application types for each low-rise adhesive option manufactured or sold by Carlisle.
