The Oceans of our World

BENEATH THE SEA

Scuba Diving and Adventure Expo

March 27, 28, 29 2026

Meadowlands Exposition Center

Secaucus, New Jersey

Scuba Diving and Adventure Travel are natural buddies.

The Beneath the Sea 2026 Expo will bring some dramatic changes as we encourage our exhibitors, old and new, to bring a taste of adventure in their travel expeditions to the expo floor.

As a diving exhibitor, do you have a good partner who could contribute adventure travel to your presentation? Consult with Beneath the Sea to create an adventure travel package presentation for your destination.

As an adventure traveler exhibitor impart the challenge and excitement your destination offers, through demonstrations on the show floor, visual safaris in your seminars, "hands-on how-to" demonstrating equipment, creating the excitement of the actual moment.

This creative opportunity offers you a chance to be inventive: a cave experience, a safari, or build something that speaks directly to the visualization of the traveler, such as a climbing wall.

Adventure experts will lecture, demonstrate, present a film experiencing a whitewater canoe run, a cliff climb, a safari, or a trip into the rain forest, to mention a few. Go to the Beneath the Sea website and sign up now.

We want to encourage speakers, by reviewing the attached introductory link and the application attached for seminars, workshops & marine careers speakers to have your presentation added to our agenda.

<https://beneaththesea.us/speakers/speaker-call.html>

The introductory page and the FAQ, should answer all your questions:

Seminar Programs must have an informative story line, more than 'just' pictures, with a narrative and a question/answer period; it must not exceed 45 minutes in total, including set-up and breakdown.

You may submit up to four programs for consideration.

Workshops provide in-depth education. Where possible and depending on subject, they could lead to a certification. Your Certificate of Completion should be awarded to the student. The length of the presentation can be either three hours (½ day) or six hours (full day) and should provide student handouts, hands-on and/or group participation. A separate contract will be issued between BTS and the workshop teacher. You may submit up to two programs for consideration.

Marine Careers is our education program focused on youth both nationally and internationally. We are interested in presentations of 20 minutes or less in duration that are geared to this age group.

Don't delay, this year we will have fewer spots to offer speakers than in previous years and if you miss the deadline you will miss inclusion in the social media campaigns.

Scuba diving will always be the beating heart of Beneath the Sea, but this year we invite climbers, kyackers, white water canoeists, spelunkers, nature photographers, zip-liners, and the like.

As always, following the dictate of our Mission Statement, Beneath the Sea maintains its tradition of service and education.
