FOR IMMEDIATE RELEASE

Mares Power Plana LT Earns Testers Choice Award for 2026 as Best New Tec Style Fins

DELRAY BEACH, FL – [March 3, 2026] The verdict is in. The Mares Power Plana LT has earned the 2026 Testers Choice Award for Best New Tech Style Fins by Scubalab—cementing its status as one of the most in-demand tec-style fins on the market today.

Built with Mares' proven XR-Tech design in blade geometry and engineered from a lightweight, flexible TPV material, the Power Plana LT delivers the control of a technical fin without the bulk and fatigue typically associated with this category. Slightly positive in buoyancy and exceptionally efficient in the water, the fin offers smooth propulsion and precise maneuverability across all kicking styles.

Test divers scored the fin very good in overall functionality and maneuverability, highlighting its effortless feel and all-around comfort. "Super light in the water—almost feels like I'm not wearing fins," one tester noted. The evaluation panel overwhelmingly selected the Power Plana LT as their top fin, praising its efficient blade performance, comfort, and ease of use.

Read the full Testers Choice Review here.

With an MSRP of $217.95, the Power Plana LT sits in a premium yet highly competitive position—appealing to both recreational divers seeking control and technical divers demanding performance.

For retailers, this award represents more than recognition—it's momentum. Third-party validation, strong tester feedback, and cross-category appeal make the Power Plana LT a high-impact product sure to sell well in your dive center throughout the year.

If you're not featuring the Power Plana LT on your sales floor yet, what are you waiting for? Place your order with Mares today. Interested in becoming a Mares dealer? Contact customerservice@us.head.com to learn how.
