FOR IMMEDIATE RELEASE

SSI Reimagines the MySSI App: Smarter, Faster and Built for the Future of Diving

DELRAY BEACH, FL – August 19, 2026

The future of diving just got a major digital upgrade. SSI just released a completely reimagined **MySSI App,** delivering a fresh new look, smarter navigation, faster dive logging, expanded social sharing, and new AI-powered technology designed around the way divers share and connect.

Already one of the most comprehensive digital diving platforms available, the MySSI App puts certifications, digital training, dive logging, marine life sightings, gear information, dive buddies, SSI Awards, dive news, Training Centers, and more directly into a diver's pocket.

Now, SSI is taking that experience to the next level.

Meet the New Dive Wizard

Logging dives just got easier. The new SSI Dive Wizard provides app users with a faster, more streamlined way to record important dive details without sacrificing the information and memories that make a digital logbook valuable. Divers can also personalize how they experience their logbook by choosing between Standard, Simple, Image-Focused, and Compact views**.**

AI-Powered Navigation Is Here

Instead of searching through menus, SSI's new **AI Navigation Tool** lets divers simply ask the app where they want to go. Looking for a certification card? A specialty program? Your dive log or profile? Just ask, and the AI tool intelligently directs you to the right place.

It's faster, smarter, and another example of SSI continuing to push the boundaries of digital technology within diver education.

Log It. Share It. Make It Yours.

The redesigned app makes the diving experience more personal and social than ever. Divers can upload photos to their dive logs, share logged dives directly to social media, showcase SSI Awards and achievements, and access a newly centralized Profile Area containing certifications, awards, buddies, statistics, recognition levels, and more.

The result is much more than a digital certification card or logbook. **MySSI is becoming the digital home for your entire diving life.**

The future of diving isn't just underwater anymore. **It's in your pocket.**

For those updating their current app to the new MySSI App, please verify all outstanding dives currently awaiting verification prior to the update. Any outstanding dives that have not been verified before updating may be lost during the transition.

Dive smarter. Share more. Stay connected with SSI. Click here to learn more:
