

The candidates, who participated in an intensive **PADI Instructor Development Course (IDC)**, demonstrated the knowledge, skill proficiency, and instructional ability required to meet PADI's global training standards.

The program was led by **Patty Ramirez**, a **PADI Course Director** and one of only two Course Directors based in Belize. Under her guidance, candidates completed comprehensive training in dive theory, confined and open water teaching presentations, and standards-based instruction.

The completion of this program reinforces Splash's commitment to maintaining high training standards and supporting the continued growth of the diving industry in Belize.

Splash is a Placencia-based PADI FIVE STAR INSTUCTOR DEVELOPMENT CENTER operation offering a full range of PADI training programs, from entry-level courses through professional certifications, along with guided diving and snorkeling experiences on the Belize Barrier Reef.
