

Update

A message from Lisa Reed, Dawn Nee and Tricia Brisbois

EpicEdge Community Program Update – October 2021

The following is our monthly update of progress including a reminder about our preferred IT Vendors, our WIISE (Data Archiving and Conversion Platform) Client Agreement, and overall project updates.

Reminder about EpicEdge Preferred IT Vendors

The implementation of Epic will require practices to have an IT vendor to complete hardware assessments and prepare the practice for the transition. The EpicEdge Community team evaluated multiple vendors and below are two preferred organizations for your consideration. To date, the Wave 1 practices have reported that these vendors have been responsive and supportive. If you already have an IT vendor for your office, you are not required to switch, but please let us know who your vendor is when we have your project kick-off meeting. If you are interested in more information about the two preferred organizations, please contact them directly for more information:

Bevelin

**When contacting, please mention the Wellforce EpicEdge project to start the process.*

Phone: 508-964-2818

Address: 70 Corporate Park Drive Suite 1260
Pembroke, MA 02359
Website: <https://www.bevelin.net/>

TCom Networks LLC

**When contacting, please mention the Wellforce EpicEdge project to start the process.*

Phone: 781-569-2975

Address: 10 Draper Street Suite 3
Woburn, MA 01801
Website: <https://tcomnetworks.com/>

Hardware Assessments & Procurement

For the Wave 1 practices, regardless of whether you have an IT vendor already or you are going to reach out to Bevelin or TCom, it is important to complete your hardware assessment as soon as possible. Due to some of the supply chain issues happening nationwide, we do not want you to be in a position where you cannot get hardware for your office in time for your Epic go-live.

WIISE Client Agreement and Pricing Finalized!

A reminder that WIISE (Wellness Intelligence and Information Sharing Enablement) has been selected as the Data Archiving and Conversion vendor for the Wellforce Enterprise (including our EpicEdge community). WIISE was selected because it is fully functional *and* cost effective. With the Wellforce donation towards this solution, WIISE data conversion and archiving will cost private practices a fraction of the price of other third-party vendors. Pricing details are outlined in the WIISE client agreement which will be available for your review on request.

EpicEdge Community Demos and Informational Sessions

This month, we hosted EpicEdge Community Billing and Program overview sessions for Wellforce private practices interested in the EpicEdge Community offering.

▼ [**Register here for our next Program Overview session scheduled for Thursday, October 28.**](#)

Please reach out to a member of our team if you would like to learn more.

Wave 1 Implementation Update

We continue to make progress with the current Wave 1 practices who will go live with the Wellforce Enterprise on April 2, 2022. This includes private practices from LMMER (MelroseWakefield), Circle, and NEQCA. The number of practices included in this initial wave is limited to ensure successful practice implementations and to ensure the physicians have a smooth transition. These practices have been assigned a Project Coordinator and continue to meet regularly to complete the implementation tasks for these practices

We are really excited to bring our affiliated practices onto Wellforce EpicEdge Community to improve and streamline care and communication for all our patients. If you would like to join us on this journey or if you have any questions, please don't hesitate to reach out.

Contact:

Please direct any questions to EpicEdge@wellforce.org or to a member of the EpicEdge Community team.
