

PLANET NETWORKS

GECC Members,

My name is Frank Cristell, I am a Sales Executive with Planet networks and a very proud new member of the Greater Elizabeth Chamber of Commerce.

Planet Networks has been connecting people, places and things since 1994.

We provide solutions to business problems. Planet Networks is a managed services provider, meaning that we install, manage, and secure all your technology needs so you can focus on running your business. From phones to high-speed Internet to cloud services to email and productivity applications to local WIFI, copper, and fiber networking to surveillance cameras to access control systems, we do it all. We are a complete one-stop trusted partner who makes complex technology simple to use and easy to afford.

Planet Networks fiber infrastructure provides hotels, apartments, and condominiums with a complete solution for Internet, television and voice services using state of the art fiber to each unit. This service will provide high speed fiber optic internet services to all community residents and tenants with services including Planet HD (High Definition) and 4K television service, premium channels such as HBO, Showtime and Cinemax and local and long-distance telephone services from a single source at a very competitive price.

We have real human beings available around the clock to quickly answer any questions our clients may have. As a managed service provider, our staff can take care of most needs internally and if any third-party vendors are involved, we take ownership and coordinate everything to save our clients time, hassle, and money. Security, reliability, and high performance are all key reasons clients choose Planet Networks. Clients of all sizes find that by utilizing Planet as their sole technology vendor, significant savings can be realized which often pay for our services without budget increases. Our complete suite of services can add significant productivity, reliability, and business value. I invite you to meet with us to review and discuss your company's current business and technology challenges to see if we can help you. We are happy to freely share our knowledge and perspective based on decades of experience to help you make more informed technology decisions. There is no cost or obligation for us to evaluate your current technology and to discuss your needs.

Please call me at **732-618-2958** or email me at **frank@planet.net**.

I look forward to meeting you at the next GECC networking event.

Best Regards,

Frank Cristell
