Agenda

- **Key definitions**
- **Enhanced Water Damage Package**
 - Sewer Back-up
 - Water and Sewer Lines
 - Overland Water
 - Ground Water (*optional excl. NL*)
- **Eligibility discussions**
- **Claims scenarios**
- **Questions**

By the end of this session, you'll be experts in all areas of our Enhanced Water Damage Package

2

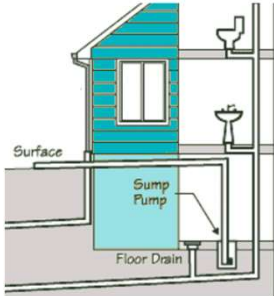

<h1>Definitions</h1>	Drain		
	Septic system		
	Seiche		
	Sewer line		
	Water service line		
	Sump		

3

4 |

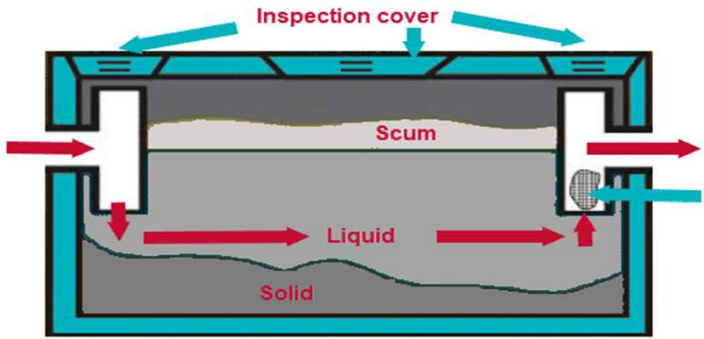

Drain

- Fixture or device located within or on the insured dwelling or additional buildings on insured premises
- Connected to the waste water and/or sewer drainage piping system
- Purpose of removing water or sewage from the dwelling
- Does **not** include weeping tile or perimeter drainage system

Septic system

- A private, self-contained waste disposal systems where municipal water is not available.

4

5

Seiche

- Standing wave in an enclosed or partially enclosed body of water (lake, reservoir, swimming pool, bays, harbours, seas)
- This could be described as an inland tsunami.

5

6

Sewer line

- The line or pipe that connects from the exterior of your dwelling to a public sewer system or private septic system.

Water service line

- The line or pipe carrying fresh potable water that connects from the exterior of your dwelling to a public water supply system, private well system, cistern or retention pond.

6

7

Sump

- Defined as a sump pit, well or basin
- Lined with concrete or other liner and located within the dwelling, connected to a mechanical or gravity-fed evacuation pump system
- Purpose is collecting and removing water
- A sump pit, well or basin not equipped with a mechanical pump or gravity-fed evacuation system is not a sump

7

8

Enhanced Water Damage Package

- Available for homeowners (incl. Secondary & Seasonal Homeowner), condominiums, tenants package and rented dwellings
- Four components:
 1. **Sewer Back-up**
 2. **Overland Water**
 3. **Water & Sewer Lines**
 4. **Ground Water** (*optional – excl. NL*)

# EWDP LOSSES WITHIN 5 YEARS	Underwriting Rules
0	N/A
1	EWDP available (Removal of Claims Free Discount)
2	Not eligible for EWDP

*SBU, OLW & GW losses (excl. Water & Sewer Line losses)

8

9

Eligibility for Enhanced Water Damage Package

Atlantic Provinces					
Risk Type	SBU	\$1,000 SBU loss mitigation	Water & Sewer Lines	OLW (if eligible)	Ground Water (optional)
Homeowners (Principal, Secondary, Seasonal Broad)	✓	✓	✓	✓	✓
Rented Dwelling	✓	✓	✓	✓	
Condominiums	✓			✓	
Tenants	✓			✓	

Coverage limits for Homeowners incl. Secondary & Seasonal (0 – 1 SBU losses in 5 years)

Territories	New Business default coverage limit	Maximum coverage limit	Default deductible
1	\$50,000	\$250,000	\$2,000
2 – 3	\$30,000	\$250,000	\$2,000
4	\$20,000	\$30,000*	\$2,000
5	\$10,000	\$20,000*	\$2,000

* Some territories require mitigation measures for maximum limit

9

10

Sewer Back-up

Back-up of water and/or waste into your customers home from a municipal sewer system, private septic system or through a sump pump failure

Includes	Excludes	Eligibility
<ul style="list-style-type: none"> - Direct physical loss or damage caused by the sudden and accidental backing up or escape of water or sewage within customers dwelling through: <ul style="list-style-type: none"> - Sewer - Septic - Sump - Drain - Loss mitigation measures 	<ul style="list-style-type: none"> - Flood - Entrance of surface water - Seepage or leakage - Ground Water 	<ul style="list-style-type: none"> - Dependent on both SBU and/or OLW losses - Possible mitigation measures in place

LOSS MITIGATION DEVICES:

If a customer installs a loss mitigation device at the time of an insured SBU loss, we'll contribute an additional \$1,000 towards the installation of the loss mitigation measure

10

11 |

Sewer back-up mitigation discounts

Peril	Prevention measure	Peril Discount %	
Sewer back-up only	Alarmed sump pump with back-up	15%	
	Alarmed sump pump with back-up and Backwater valve	31.6%	
	Alarmed sump pump (no back-up)	10%	
	Alarmed sump pump (no back-up) and Backwater valve	28%	
	Backwater valve	20%	
	Backwater valve & Sump pump	24%	
	Backwater valve & Sump pump incl. battery back-up	28%	
	Septic system	40%	
	Sump pump	5%	
	Sump pump incl. battery back-up	10%	
Sewer back-up and Water	Basement	0% Finished	35%
		1 – 40% Finished	25%
		41 – 61% Finished	20%
		61 – 80% Finished	10%

11

12 |

Water & Sewer Lines

Sewer Line means the line or pipe that connects from exterior of dwelling to a public sewer system or private septic system.
Water Service Line means the line or pipe carrying fresh potable water that connects from the exterior of dwelling to public water supply system, private well system, cistern or retention pond.

Includes	Excludes	Eligibility
<ul style="list-style-type: none"> - Coverage limit is \$10,000 (<i>no option to increase</i>) - Deductible matches Water Damage deductible 	<ul style="list-style-type: none"> - Data, gas or electrical lines - Does not include loss or damage from: <ul style="list-style-type: none"> - Blockage or low pressure of the line - Treatment, removal, recovery or disposal of pollutants or hazardous material - Sewer/water line that runs through or under body of water (pool) or not already connected & ready for use 	<ul style="list-style-type: none"> - Only available as part of EWDP - Provides coverage to repair or replace customers sewer line or water service in relation to coverages in EWDP

12

13

Overland Water

Fresh water that comes from rivers or lakes, or it could be the result of rain or snow melt, spring run-off. Coverage protects against water damage caused by these factors and enters your home from a point at or above ground level.

Includes	Excludes	Eligibility
<ul style="list-style-type: none"> - Flood caused by dam break, or the rising of, breaking out or overflow of any body of water or watercourse, whether natural or man-made (ex: overflow of river, lake or canal) - Sudden and accidental entrance of surface water (ex: accumulation of heavy rains or rapid snow melts) - SBU occurring concurrently with above 	<ul style="list-style-type: none"> - Flood caused by waves, tides, tidal waves, tsunami, storm surge, seiche - Continuous or repeated seepage or leakage of water - Ground water or rising of the water table - Dwelling under construction or vacancy unless we have given permission - Caused by landslide or other earth movement 	<ul style="list-style-type: none"> - When EWDP purchased, OLW automatically included for eligible risks - Eligibility is based on Overland Water Territories - Overland Water covers damage to property caused by waterborne objects

13

14

Eligibility for Overland Water

Coverage limits for Homeowners incl. Secondary & Seasonal (0 – 1 SBU losses in 5 years)

Risk Type	Territory 1 (Low Risk)	Territories 2, 3 & 4 (Medium Risk)	Territories 5, 6 & 7 (High Risk)
Homeowners	Up to SBU Limit	\$10,000 – SBU limit (increments of \$10,000)	No coverage
Rented Dwelling	\$30,000	\$30,000	No coverage
Condominiums	Coverage Limits (max of \$250,000)		No coverage
Tenants	Coverage Limits		No coverage

14

15

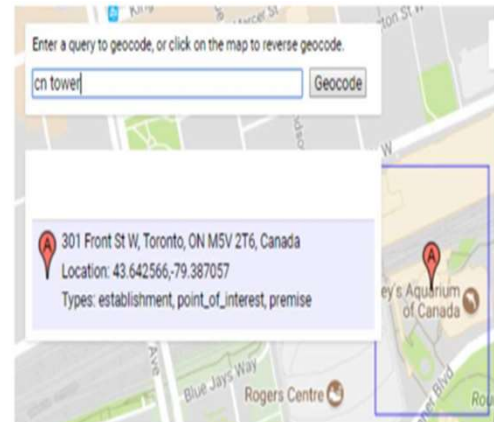

Assigning Overland Water territories

Flood mapping and Geocoding to do the following:

- 1) Assign Overland Water territories to risks
- 2) Use territories to determine level of coverage customers are eligible to purchase

When used with flood mapping, Geocoding considers:

- | | |
|----------------------------------|---|
| ✓ Elevation | ✓ Soil permeability |
| ✓ Topography of location | ✓ Severity and frequency of events |
| ✓ Surrounding bodies of water | ✓ Snow-melt accumulation |
| ✓ Historical rainfall statistics | ✓ Man-made structures such as dams, reservoirs, dikes, etc. |
| ✓ Historical river flow data | |

15

16

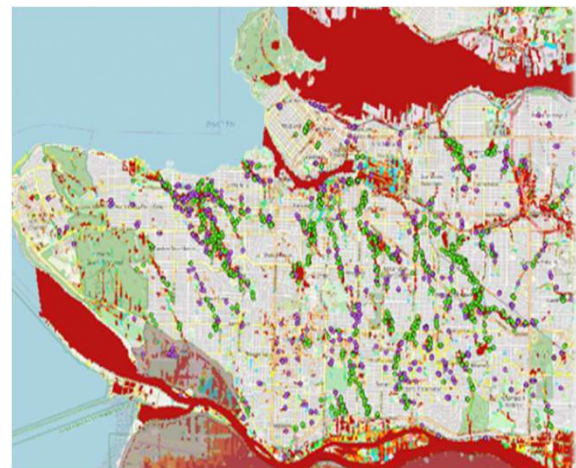

What is Flood mapping?

- Comprised of numerous layers of data
- Provides detailed view of a specific area
- More than just visual representation of bodies of water in area

Common layers used within Flood Map:

- 1) Types of flooding
- 2) Causes of flooding in area
- 3) Return Periods
- 4) LiDaR and Bare Earth Data

16

17

Ground Water (available NS, NB & PEI)

Water underground in the cracks and spaces in soil, sand and rock. These are saturated zones beneath the land surface.

Includes	Excludes	Eligibility
<ul style="list-style-type: none"> - Water damage caused by rising of water table and/or resulting from sudden and accidental entrance of ground water through basement walls, foundation or floors. 	<ul style="list-style-type: none"> - Flood caused by waves, tide, tidal wave, tsunami, storm surge or seiche - Continuous or repeated seepage or leakage of water - While dwelling under construction or vacant unless permission given - Landslide/earth movement - Foundations, footings, slabs or perimeter drainage systems 	<ul style="list-style-type: none"> - Customer must purchase EWDP with Overland Water - Only optional component of package

17

18

Anti-concurrent Causation Clause

"These exclusions apply whether or not there are one or more other causes or events (whether covered or not) that contribute concurrently or in any other sequences to the occasioning of the loss or damage."

What does this mean to you and your customers?

- Helps define type of water damage event that should and should not be covered within each of the coverages offered by Enhanced Water Damage Package
- States when a loss is caused by combination of events, some covered and others excluded, there is no coverage under that section of Package
- Need to look to other sections of EWDP to see if coverage applies

Example:

- Sewer back-up excludes loss or damage caused by flood
- If customer has covered SBU loss that is also related to flood (excluded loss) then there is no coverage for loss under SBU coverage
- Does customer have OLW? If so, this loss would be covered according to coverage limit for OLW

18

19

168-Hour Rule

- Multiple events happening in short time frame will be considered one occurrence
- 168 hours or 7 day period
- One deductible, one coverage limit will apply

Example:

- Overflow of river, surface water from rainfall and sewer back-up all cause damage to customers home within 7 day period
- Customer will not be penalized by multiple deductibles
- Coverage limit for OLW will apply

Enhanced Water Damage Package

Click for Coverage Summary

The Enhanced Water Damage Package provides customers with an added level of protection and choice against water-related claims. It's available to customers with Homeowners policies (including Secondary and Seasonal Homeowner Broad form), condominium owners, tenants and rented dwelling customers.

This page contains updated resources to help brokers learn more about the Enhanced Water Damage Package, and to assist them in having conversations with customers.

Resources for Brokers

Please acknowledge and include where disclosed to fully disclose the Enhanced Water Damage Package with customers

ENHANCED WATER DAMAGE PACKAGE

The Enhanced Water Damage Package offers broader water damage coverage in the event of a water loss. It consists of up to four components for Homeowner risks (including Secondary & Seasonal Broad form), up to three components for Rented Dwelling risks, and up to two components for Condominium (Owned, Rented, Seasonal & Secondary) and Tenant risks.

RISK TYPE	Sewer Back Up	*\$1,000 SBU Loss Mitigation	Water & Sewer Lines	Overland Water (if eligible)	Ground Water (optional)
Homeowners (Principal, Secondary, Seasonal Broad)	✓	✓	✓	✓	✓
Homeowners (Rental)	✓	✓	✓	✓	✓
Condominiums	✓	✓	✓	✓	✓
Tenants	✓	✓	✓	✓	✓

*\$1,000 Sewer Back Up Loss Mitigation is a feature of the Sewer Back Up coverage

The components constitute a package and cannot be purchased separately. Sewer Back Up is a mandatory component of the Enhanced Water Damage Package.

NB, NS & PEI Effective: January 2023
