

 **Massachusetts Society
of Optometrists**

The Massachusetts Board of Registration officially approved the use of IPL devices for Optometrists.

On behalf of Lumenis, the inventor of IPL Technology, we'd like to congratulate the State of Massachusetts on this remarkable milestone.

Questions? Please feel free to contact Audrey.Baker@Lumenis.com

Sincerely,
The Lumenis Team

So Why IPL?

IPL has become an essential tool for dry eye management. The Lumenis Optima IPL has performed well beyond my expectations.

I consider it the standard of care.

Dr. Art Epstein, OD

Optima IPL

The Value of Optima IPL:

Periocular inflammatory conditions such as rosacea and eyelid telangiectasia can lead to ocular conditions such as dry eye.

It is a drug-free, drop-free solution intended to treat the root cause of the inflammation by reducing the level of pro-inflammatory mediators and demodex – a must have in your tool box.

We invite you to read more about [Optima IPL](#) and Antares.
