## WHAT IS CONSTRUCTION CAREER DAY & SCIENCE AND TECHNOLOGY EXPO?

- Construction Career Day is a fun-filled educational event that the Nevada Contractors Association (NCA) is hosting at CSN, which introduces students from Middle and High School to the construction industry. As the industry is booming and there is a shortage of professionals within this field, the NCA is trying to educate students about the endless opportunities within construction. This year, the Construction Career Day is being held in conjunction with CSN's Science and Technology Expo, so students will get to learn about the construction industry, as well as all of the wonderful programs and classes offered at CSN!

# WHY BRING YOUR STUDENTS TO THIS EVENT?

- Construction Career Day gives students the opportunity to engage with construction professionals in a setting where they can ask questions and get information about different construction fields.
- Students will participate in hands-on activities using tools, high-tech gadgets, and their creative minds.
- Students will get a chance to learn more about CSN's programs and facilities, including their planetarium and drone demonstrations!
- Informative presentations for teachers, as well as students, will provide insight into different career opportunities and the different paths students can take to achieve their goals!

## 150+ Exhibitors with Interactive and Hands-On Activities
