

Free IT Health Assessment

by Resource Computer Solutions

Resource Computer Solutions specializes in assisting companies in attaining enterprise-level stability, security, and compliance management. RCS will work with you to develop a customized plan to acquire the peace of mind in dealing with today's complex cybersecurity landscape.

WHAT THE IT HEALTH ASSESSMENT INCLUDES

A complete network scan

A discovery of IT assets including information on:

Operating Systems	Network Information
Printers	Anti Virus Information
Patching Status	Applications Installed

An Active Director Scan provides information about:

Security Groups	Users
Password Analysis	Inactive Users
Account Assessment	FSMO roles
DC Info	Group Policy Objects

Server Role Listings (DNS, DHCP, SQL etc)

A thorough Security Scan:

Login patterns	Login failures
Anomalies	Account Analysis
User Behavior	RSOP assessment
Computer Settings	Shares

External Vulnerability Scan

RCS will thoroughly evaluate your company's IT infrastructure and devices to determine where your company meets or exceeds industry standards and will identify areas that require attention.

Once the assessment is completed, RCS will schedule a time to present our findings. This process allows RCS to develop a customized plan tailored to your company's unique needs, ensuring you receive the services and support necessary to keep your company moving forward amidst the rapidly changing IT landscape.

Now is the time to take the first step towards securing your business's future. **Don't wait – your peace of mind is just a call away!"**
