

CONSTRUCTION CAREER DAY 10.7.16

100+ Exhibitors!
1000+ CCSD Students!

Undergraduate &
Graduate Students

*Meet potential employers
with scheduled on-site
interviews*

Construction Career Day is about introducing high school students to careers in the construction industry and construction-related fields, including the trades, construction management, engineering, architecture, and related secondary fields such as accounting, marketing and facilities management. It's designed to educate our youth about a professional industry that is exciting, lucrative, and full of prospects for career development. This one-day event will allow students to see a demonstration of different types of construction machinery, participate in workshops, learn about internships, apprenticeship programs and higher education opportunities, and have hands on experience with construction from interactive displays and vendors.

The registration deadline for exhibitors
and sponsors is **September 8, 2016**
