THE BEDROCK REPORTING SYSTEM™

TAG RESOURCES PROPRIETARY SOFTWARE

BEDROCK

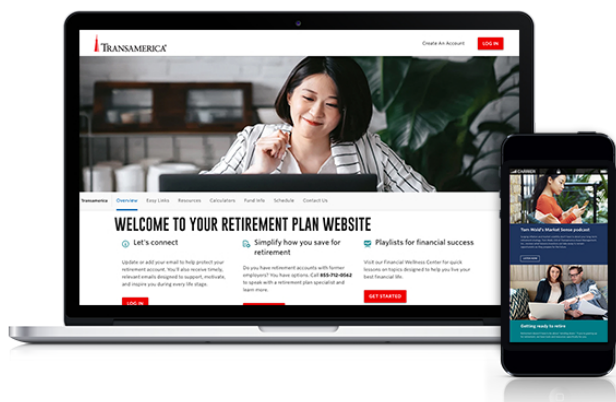

With data gathered from contribution files from the plan sponsor and recordkeeper, TAG can match employees with specifics provided in the plan document to determine eligibility and verify participant information. In addition, the system captures rate changes, new loans, and hardship withdrawals and monitors contributions and distributions to ensure compliance with plan documents and 401(k) limits. Every step in the process is time-stamped, so the complete data cycle is monitored. The system allows TAG to monitor operational health and catch minor errors before they expose the plan to possible compliance violations.
