## Pick TN

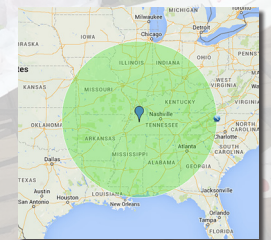

vs.

## Local Produce

**Pick Tennessee Products** are products that are exclusively raised and harvested in the state of Tennessee. We prefer to sell these products at the Market, when available. Pick Tennessee is a government organization that exists to help markets and advocate for farmers in Tennessee. For more information about Pick Tennessee products, visit their website at [www.picktnproducts.org](http://www.picktnproducts.org)

**Local Produce** is defined as produce that is raised within a 400-mile radius of the Market. Local farms sometimes sell this produce to help support themselves, while their crops grow. When we eat produce grown within 400 miles, we are able to break the supply chain and eat vine-ripened fruits and veggies, as opposed to produce that is picked before it's ripe and ripened by chemicals in stores, houses or trucks.
