

# Buzz Bowl

Makes learning Fun!

## Learning Math and Science can be Fun too!

**Join us @ Tillicum Middle School**  
**February 10, 2019 ~ 8:30am — 2:30pm**

My name is Aum Upadhyay. I'm an accomplished national award-winning science student at Interlake High School. I created **Buzz Bowl**, a buzzer game to make Math and Science learning fun for **5th-8th graders**. My previous events were a huge success. See what the parents from my past Buzz Bowl events have to say about their experience.

As always, we make the questions **much easier** for kids who are **beginning to learn science** and **more challenging** for **Advanced players or Science Bowl Whizzes**. We play all difficulty levels separately to provide an exclusive and level appropriate experience.

**For new parents:** Buzz Bowl is a buzzer game of multiple-choice and short answer questions. Teams challenge each other to buzz faster and answer the questions. Whether your kid is a beginner or a whiz, it offers fun and challenge to everyone! It's a great way to learn science early. Kids just need to pick a subject, study our recommended material, have fun and possibly win awards! We always try to give more awards than our last event.

You can register only as a team. We require at least 3 students and at most it can be 4.

- To reserve seats **as a team (\$60)**, go to <https://goo.gl/WqSJML>
- For any questions, email us at [science4community@gmail.com](mailto:science4community@gmail.com)

**We got oversubscribed last time. So hurry, the seats are limited !!!**

Your participation will help Bellevue Schools Foundation to fund more programs which matter to you!
