

One more opportunity to schedule Flu vaccinations for the 2021-2022 Flu Season

Flu Vaccinations 2 – Ways

- 1) **Employers can be billed directly for workers who come in to one of our four clinics. To minimize the number of people in our clinics please have them call ahead to schedule.**
- 2) **Employers can still arrange for an on-site flu vaccination clinic which can be billed to the employer. We can accommodate most date and time requests. The overall time that our staff will be on-site will be determined by the number of people to be vaccinated.**

Cost & Invoicing A minimum fee equivalent to 25 vaccinations will be charged if fewer than 25 are administered.

Vaccinations will be billed to the employer for the Quadrivalent (4 strain) vaccination at **\$30 per person**.

Travel: Within 25 miles of MOH Midway clinic, travel is included in the price. If farther, a charge of \$0.55 per additional mile will be invoiced.

COVID Symptoms: Vaccination of anyone with symptoms or anyone that is suspected to have COVID, even without symptoms **should be postponed**.

COVID Prevention: Any queue of people waiting to be vaccinated must maintain appropriate social distancing and everyone **must bring and wear a covering over their mouth and nose** while in proximity to the vaccination station.

Schedule Time: Please plan on scheduling your employees to arrive at a pace averaging 20 vaccinations per hour.

Vaccine Information: The 2021-22 vaccine is for adults 18 years and older, delivered by injection. This season's flu vaccines were updated to better match viruses expected to be circulating in the United States. They include: H1N1, H3N2, B/Victoria lineage, and Yamagata lineage. People with severe, life-threatening allergies to flu vaccine or any ingredient in the vaccine should avoid this vaccination. This might include gelatin, antibiotics, or other ingredients.
