

## PUMPING LIFEBLOOD!

Your heart is the one pump we cannot mend.

We leave that to our brilliant hospitals and the wonderful people who work there.

However, we do look after the hospitals and their pumps.

For example....

- Sewage stations
- Pressurisation units and booster sets
- Heating/ chilled water pumps
- Repair and replacement
- Energy surveys
- 12 months warranty on all repair work

You can rely on our fully equipped mobile engineers who offer you emergency call out assistance.

Or, you can choose our preventative maintenance programmes to reduce untimely breakdowns.

We cannot fix your heart but we can take some of the stress out of it!
