

Magnetic charm!

These little beauties (sad but true, in the pump world these are good looking!) are magnetic coupled pumps, so no mechanical seals to fail and leak. That's good isn't it?

Not only does that save you money, but also limits the risk of leaking nasties on your floor.

Revelling in the moniker "UTS EVO" from CDR Pumps, their new magnetic couplings are highly efficient and linked to redesigned hydraulics there is an overall improvement of 21% in efficiencies. Not to be sniffed at!

Want to know more? We would be seriously charmed to make your acquaintance.
