GRILL PHIL

Phil, we no longer have an on-site engineer looking after our fire pumps. Any ideas?

Yes, I would recommend you take a look at the Peerless FireConnect® system.

FireConnect® is a monitoring system that provides monitoring of all your fire pump systems key parameters on a continuous basis. Including flow rates, pressures, fuel levels, running history and many more.

The system is cloud based and available from any smart phone or computer.

Click the link below for an introductory video.

https://www.peerlesspump.com/wp-content/uploads/2022/02/PEERLESS-FIRECONNECT-1.mp4

There is also a brochure to be found at the link below.

https://www.peerlesspump.com/wp-content/uploads/2020/08/20-GNA-0360_datasheet_Peerless-Pump-1-Pager-FireConnect_v13.pdf

Critically, the system can be retrofitted to any fire pump system.

Would you like to know what your fire pumps are doing?
