

## A mine of information

Our lovely customers can be found all over the world.

Wherever you are, and whatever industrial pump requirements you may have, you will find us ready and willing to fulfil your wants and needs.

We recently shipped a 1 Tonne pump via air freight to an African Gold Mine.

The new pumps you buy from us are of course fairly glittering, especially the highly polished stainless-steel versions for food and beverages.

However, all machines, will deteriorate over time, and when you bring us your old pumps to refurbish we not only make them as mechanically and electrically new as possible, we make them look good too!

So do give us a call today and let us put some sparkle into your old pumps!
