

GRILL PHIL

What have you got for me this month Phil?

More about fires for you, I regret to say.

Waitrose store in Hove suffered a serious fire on 16th June.

<https://www.bbc.co.uk/news/articles/cd0mn9py3jeo>

Fortunately, nobody was hurt.

However, Waitrose has lost the use of the premises for some considerable time, serious damage to their buildings, massive loss of food and stock, and business losses while closed.

Also, presumably staff will need to be paid until the store re-opens.

How much is this going to cost? MILLIONS.

The question I have is what price an effective sprinkler system or other automated fire prevention measures are today? Whatever it is, it looks very cheap.

Either there was insufficient provision in this regard, or what was there did not work at all, or as intended.

Do your fire systems work as intended, and are they adequate?

If you want to know about Peerless FireConnect®, or fire pump systems please let me know.
