COUGAR PUMPS ACHIEVES SAFECONTRACTOR™ APPROVAL

We are proud to announce that we have successfully achieved SafeContractor™ accreditation, marking a significant milestone in our ongoing commitment to health, safety, and operational excellence.

SafeContractor™ is a leading accreditation scheme that recognises businesses which demonstrate rigorous standards in health and safety management.

Gaining this approval reflects our dedication to maintaining safe working practices across all areas of our operations, from on-site engineering to customer service delivery.

This achievement reinforces our position as a trusted provider of pump solutions throughout the UK.

By meeting the stringent criteria required for SafeContractor™ approval, we have demonstrated our ability to effectively manage risk, protect our workforce, and ensure the safety of our customers and partners.

Successfully passing this evaluation highlights our proactive approach to compliance and continuous improvement.

Cougar Pumps remains committed to providing reliable, efficient, and safe pump solutions to our customers across a wide range of industries.

This latest development represents another step forward in our growth and reinforces our reputation as a dependable and responsible business within the pump sector.
