THE FUTURE OF BAREFOOT MASSAGE

Center For Barefoot Massage Training

<http://barefootmassagecenter.com/regist-n-y>

HOW WE ARE DIFFERENT

We begin where other barefoot massage modalities leave off. Our focus is on exploration of how to engage tissue within each stroke using theories of myofascial release, trigger point, deep tissue and active/passive/resisted range of motion techniques applied by your feet.

3 DIFFERENT PATHWAYS

Our graduates choose their own adventure: Different tracts that can take you deeper into the niche of massage you "knead" most, be it for relaxation/spa, sports massage, and clinical/rehab.
