

Commit to Community Sustainability

This year, Sustainable Stanford is celebrating sustainability for Earth Day in new ways. In partnership with the Health Improvement Program (HIP), BeWell, and local area non-profits that need your support, we encourage you to make your commitment to community sustainability to recognize Earth Week. There are a variety of opportunities to contribute, whether on campus or with one of our partners. Your participation will qualify for the Engagement portion of your BeWell commitment, and also earn you ten points in My Cardinal Green.

Join us on campus for an **Earth Day Service Event on April 22, 2019**. Volunteers can support native habitats in the foothills or drought tolerant landscaping in the Arizona cactus garden. Volunteer from 11 am -1pm, or in one-hour time slots, or for the whole time. **Sign up online**
