

WATCH OUT FOR BIKES!

Hearing of new students coming to campus should also remind everyone that there will be more BIKE TRAFFIC! Watch out for bikes and pedestrians, especially in September when students are getting familiar with the campus.

While riding your bicycle, obey all traffic laws and wear a bicycle helmet. Helmets can greatly reduce the risk of head injuries and death. Don't "hit the road" without one. However, even the best helmet has limitations. Defensive cycling is the key to bicycle safety.

Bicycling safety tips

- Always wear a helmet
- Register your bike
- Don't use a cell phone while riding unless using a hands-free device
- Ride at a safe speed for conditions
- Have your brakes adjusted and working properly
- **Stop at stop signs**
- Ride on the right side of the roadway
- **Yield to pedestrians in crosswalks**
- Ride in the correct direction in one-way areas
- Use lights when riding after dark
