    - o Ventriculostomy

NTDB Preexisting/Hospital Events Tab (*NEW*)
- ImageTrend has made some updates to the registry to include adding in a new tab called "NTDB Preexisting/Hospital Events"
  - **Complication information is listed on the top of the page**
  - **Comorbidity information is located towards the bottom of the page**

Complications/PI Tab

- TR23.15 Defaulted to "Closed"
- TR23.19 This location was defaulted to "CathLab" but has been changed and is now defaulted to "Location of Occurrence"

- TR23.11 This was defaulting to "system" checked but has been changed and is now defaulted to nothing checked.

Outcome Tab

- Log of Admissions has been added into the registry
  - You may use this to track days your patients are in various wards/units; this may help you monitor patients.
