

JOHN LEITEL Bio

Turning Data Into Cleaner Air

John Leitel is an environmental scientist and the Program Development Manager at Konica Minolta Gas Monitoring. Driven by a passion for innovation in emissions detection, he leads initiatives that leverage cutting-edge technology to advance emissions monitoring.

John has built a 15+ year career in environmental compliance and reporting. His extensive background includes conducting field measurement inspections, designing LDAR and GHG programs for the oil & gas and chemical processing industries, and championing the use of advanced optical gas imaging (OGI) technology to minimize environmental impact.

John enjoys canoe trips and camping, keeping honeybees in the backyard, and trying to learn welding.
