Amatrol creates innovative, interactive learning solutions for industry and education to equip people with the skills to master technical systems, solve problems and adapt to a rapidly-changing workplace.

Amatrol offers hands-on, interactive, skills-based technical training available via the web to help you truly extend your learning opportunities well beyond the boundaries of a traditional classroom.

Members may choose from a wide range of self-directed courses that include the use of graphics, 3D simulations, videos, and complete explanations. The website offers over 400 courses in automation, electrical, fluid power, manufacturing processes, structural engineering, and more.

Product Categories

Learning solutions are designed and built by employees who are experts in their field, integrating the best practices in education and training to deliver knowledge and skills for real jobs.
