

Date: May 20-21, 2017

Location: Kettunen Center, 14901 4-H Dr., Tustin, MI 49688

Cost: \$45.00

At the Teens as Teachers workshop, teen leaders (age 13-19) will gain facilitation and leadership skills that will prepare them to teach a FUN hands-on educational activity.

Each teen leader will teach the activity they learn at the training to a group of kids in their local community. As a teen leader, you will have the advantage of being able to make learning fun and relatable to the young people you teach; serving as a role model for younger 4-H members. Teens in each track will work together to prepare, implement, evaluate and report on the progress of their local implementation of the activity in one of four tracks: Ag Innovators, Money Skills, Leadership, or Science (more track details are provided on the back of this flyer). Training and all teaching supplies will be provided.

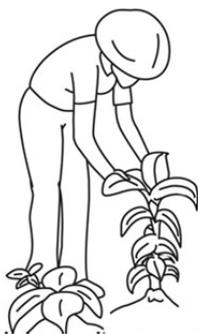

Teen Leader Responsibilities

- Provide leadership to implement planned hands-on activity that will reach a minimum number of youth in Michigan
- Utilize 4-H Experiential Learning Model to engage youth in rich learning experiences
- Participate in team update calls and respond in a timely fashion to team communications
- Assist with collection of program evaluations from youth participants

Skills You Will Develop

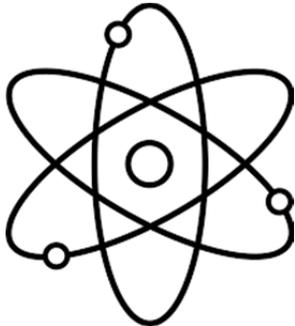

- Leadership
- Communication
- Teamwork
- Collaboration
- Self-motivation
- Responsibility
- Critical thinking
- Organization

Teen participants will pick one of four workshop tracks:

Ag Innovators Experience track!

The world population is expected to reach 9 Billion by the year 2050, and with the number of adults working in the agriculture sector decreasing, we need to get young people excited about ag! This track will feature the “Healthy Soils CSI Challenge” that will explore the importance of soil in our food system. This science-based activity will promote career exploration in the areas of STEM and agriculture while teaching youth life skills!

Share your love of science track!

The True 4-H Science Leaders program is designed to help teens develop skills, implement plans, and voice their love of science with others in their community. In addition to growing your understanding of science along with leadership, communication and teamwork, you will also engage in a variety of hand-on science investigations to learn ways to help others experience the excitement of science exploration in this track!

Money Management Track!

If you are interested in helping younger youth, want to positively impact your community, and/or want experience teaching children, this workshop will give you the skills to do all those things! Plus, knowing how to handle money now will make life so much easier when you are an adult! Through this initiative, 4-H teens will teach elementary school students in their community basic financial concepts using children’s books and hands-on activities.

Leadership through Parliamentary Procedure Track!

Understanding the basic principles of parliamentary procedure can improve meeting productivity. In this track, teens will learn multiple activities to help other youth in their communities learn how using parliamentary procedure can help them be better leaders! This is one of MI 4-H’s most requested trainings and YOU’LL get to be one of the valued facilitators.
