

DISINFECTION SERVICE

For COVID-19, other common viruses, bacteria, and more

Your business runs on people – employees and customers. Nothing is more important than knowing they are safe. Viruses, bacteria, fungi, and mold pose a constant, invisible threat to that safety. With Rentokil's Disinfection Service, get the peace of mind that you need to know both are safe from these unseen dangers.

CRITICAL DISINFECTION

- Developed to help you maintain a high level of hygiene on your premises
- Highly-trained Specialists use ultra-low volume (ULV) disinfection fogging
- Disinfection formula is environmentally friendly, hypo-allergenic & non-harmful
- No harsh fumes or visible residue
- Get back to business in as little as 30 minutes following treatment
- Rapid response service
- This precautionary service is designed for businesses that have not had a confirmed case of COVID-19 and is conducted where there are no suspected cases, mold issues, or other major contamination incidents underway at a site

WHAT IS ULV DISINFECTION FOGGING?

- Uses ultra-low volume foggers to disperse disinfectant
- Creates extremely small disinfectant droplets
- Treats contact surfaces and inaccessible areas
- Treats large area in short time-span

EFFECTIVE ON CRITICAL HARD SURFACES:

- | | |
|----------------|-----------------------|
| • Floors | • Faucets |
| • Door handles | • Toilets |
| • Handrails | • Remote controls |
| • Push bars | • Tables and counters |
| • Switches | • Hard-backed chairs |
| • and buttons | • Other common |
| • Sinks | surfaces |

DISINFECTION SERVICE

Preparation Checklist

You've taken the first step in keeping your employees, customers, and guests protected from unseen viruses, bacteria, and mold by scheduling a Rentokil Disinfection Service. Next, it's time to prepare your facility for the service to ensure that it can be conducted safely.

PRE-SERVICE INSTRUCTIONS

On the day of your service, please make sure that all of the following actions are taken. If any of these steps are not taken, it could delay your disinfection service.

ACTION ITEM

- ☐ Thoroughly clean all heavily soiled exposed surfaces to be treated.
- ☐ Remove or carefully protect (cover) any items that should not be treated, including the following:
 - ☐ Exposed food
 - ☐ Food packaging materials
 - ☐ Paper items
 - ☐ Electronics (optional)
- ☐ Glassware, dishware, cookware, and utensils can remain in the treatment area.
- ☐ Cover aquariums/fish tanks and turn off pumps prior to service; pumps should remain off until service is complete.
- ☐ Remove pets, birds, and reptiles from the treatment area.
- ☐ Ensure service personnel have access to all areas to be treated. Do not forget to unlock any cabinets, closets, or other areas that you wish to be treated.
- ☐ Ensure no persons other than those performing service remain in the treatment area.

POST-SERVICE INSTRUCTIONS

You can get back to business quickly after your Disinfection Service, which begins inactivating pathogens within 10 minutes. **Please wait at least 30 minutes after the service is complete before allowing people to return to the treatment area.**

ABOUT OUR FORMULA

Rentokil's disinfecting formula targets the most harmful viruses and bacteria, but is mild enough to be used in high-use environments.

- Environmentally friendly
- Biodegradable
- Hypo-allergenic
- No skin irritants
- No harsh fumes
- Non-flammable
