# Continua SQ4 Family
Continues to expand

NEW: BAFFLES, INDIRECT SUSPENDED, WALL MOUNT, 2 FT & VIVIDTUNE

Cooper Lighting Solutions is excited to announce the release of additions to the Corelite Continua™ SQ4 family. The SQ4 will now have a full offering of Direct-Indirect, Direct, and Indirect configurations. We have also added louvered baffles, a linear wall mount and 2ft to the family offerings. The SQ4 product family is now available with VividTune for your tunable white applications as well.

Baffle

The Continua SQ4 Suspended is now available with black or white louvered baffle that reduces glare and provides a unique aesthetic. Our new Baffle offerings have a **UGR <16 and as low as 4**. With standard white, black, silver, and custom color fixture finishes, you can create the perfect low glare fixture for any space.
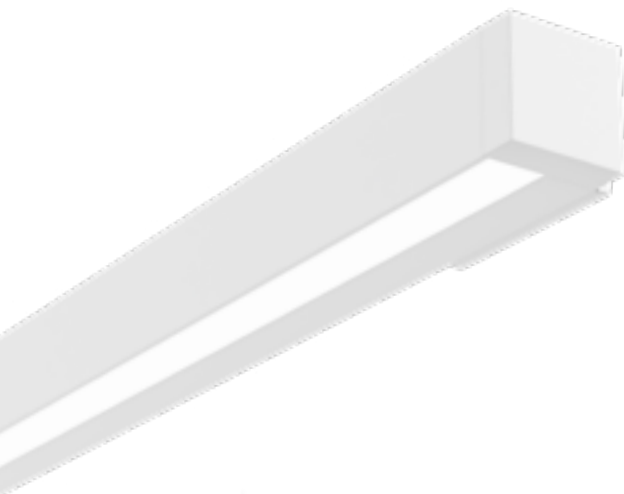

See the Continua SQ4

Indirect Suspended

The Continua SQ4 is now available with 100% indirect in the same compact square design and options. Standard precision-engineered optical control produces a wide, smooth batwing distribution that enables broader row spacing with the potential to use less fixtures while achieving the target illumination at up to 163 LPW. This offering can be combined with existing direct/direct-indirect as part of a project or linear run.
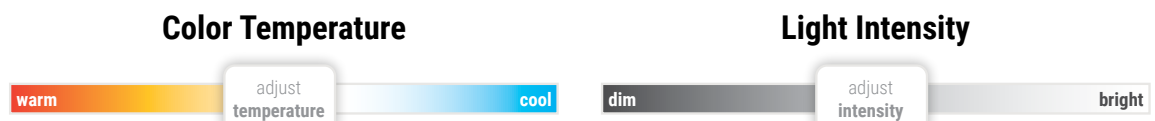

See the Continua SQ4

Wall Mount

The Continua ™ SQ linear wall-mount is the companion wall mount product within the Continua SQ4 family and has a broad selection of direct/indirect lumen outputs, as well as independent up/down circuiting for ultimate flexibility. The Continua™ product family is well suited for commercial open offices, private offices, conference rooms, corridors, and educational facilities.

Vividtune

The SQ4 Family is now available with VividTune. Workspaces thrive in the right lighting environment. VividTune's tunable white solution allows you to adjust the color temperature of light - from warm white to cool white, creating an environment that fosters productivity and concentration.

Color Temperature

warm | adjust temperature | cool

Light Intensity

dim | adjust intensity | bright
