

# Integrated Pest Management

A long term solution for unwanted rodents

## COVER

Ensure all garbage bins, pet food bowls, and food containers have secure lids.

## CLEAN

Don't make your home a target for unwanted rodents by leaving out food and water. Tidy up inside and out to minimize shelter.

## SEAL

Protect your home or business by sealing holes from the inside and outside of the building.

## Rodenticide Alternatives:

- **cayenne pepper**  
Sprinkle some of this where you've seen rats/mice. The spice is also an effective bug repellent and won't harm other animals.
- **botanical repellents**  
Effective odor repellents drive rodents away
- **electronic/ carbon dioxide traps**  
More humane than glue or snap traps
- **rodent strobe lights**  
Bright lights drive away rodents without killing them.
