

Tarleton Pre-Veterinary Medical Association Students Explore Opportunities at Texas Tech University School of Veterinary Medicine

Over Valentine's Day weekend, 30 students from the Pre-Veterinary Medical Association visited the Texas Tech University School of Veterinary Medicine in Amarillo, Texas. The trip offered valuable insight into the school's educational programs while providing students the opportunity to engage with faculty and alumni.

During the visit, students explored the facilities and learned about the vast opportunities available to future veterinary professionals. They spoke with recruiters to gain a deeper understanding of the admissions process and the distinctive features of the veterinary curriculum.

A standout moment was connecting with five Tarleton alumni currently enrolled at Texas Tech's School of Veterinary Medicine. The alumni shared their experiences with the admissions process and offered perspectives on the program's daily realities. Their advice helped students clarify the steps needed to pursue a veterinary career.

On their return to Stephenville, the students also toured the Food and Animal Sciences Center at Texas Tech University in Lubbock, learning about opportunities to earn advanced degrees, including Master's and Doctorates.

The visit facilitated the development of meaningful professional relationships and provided students with a better understanding of their career trajectory in the veterinary field. The connections made at Texas Tech will continue to guide and inspire them as they pursue their professional aspirations in veterinary medicine.
