WEBINAR

Extend Valve Life: Corrosion Prevention for Municipal Water

Corrosion is a leading cause of valve failure in municipal water systems, driving up maintenance costs and risking service reliability. This educational webinar delivers practical strategies to prevent corrosion, protect critical assets, and maintain water quality. Learn how to identify risks, implement proven protection methods, and extend the life of your infrastructure.

After this webinar, you will be able to:

- **Explain the role of strainers and ACVs in municipal water systems**
- **Identify causes and signs of valve corrosion, including MIC**
- **Evaluate the impact of corrosion on water quality and system reliability**
- **Apply proven strategies to prevent corrosion and extend valve life**

Attendees will receive a Certificate of Completion, that can be submitted to their state primary agency.
