

Interlake-Eastern
Regional Health Authority

Wound Care Level 2

SEPTEMBER 18, 2024

FROM: 9:00am – 3:30pm

Selkirk Regional Health Centre

Public Meeting Rooms 1-3

120 Easton Drive, Selkirk MB

The one-day workshop provides discussion on:

- The etiology and management of diabetic foot ulcers
- Different etiologies and management strategies for lower leg ulcers, including venous leg ulcers, arterial leg ulcers and mixed disease ulcers
- Prevention, assessment and management strategies for pressure injuries

Discussions will include:

- Identification and treatment/management of the causes of the above wound etiologies including edema management and pressure redistribution/offloading
- Local wound care including wound bed preparation and dressing selection
- Treatment indications and contraindications
- Addressing patient-centered concerns
- Case-based discussions and interactive activities
