

Please...for your safety and theirs...

Wear a mask during home visits!

We urgently request that all recipients of home care services, and ***any family members present while services are delivered***, wear masks and/or other recommended personal protective equipment **while the home care worker is in the home**. The following practices will keep both you and our hard-working and vulnerable home care workers safer, and will allow the greatest level of safe service to the greatest number of clients.

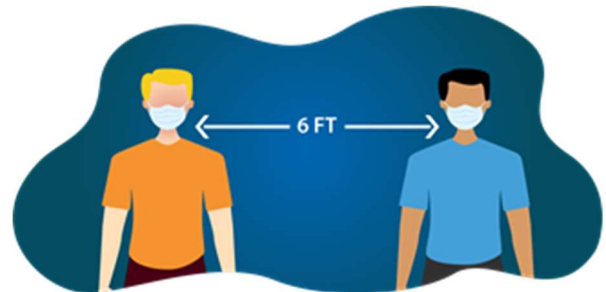

Please wear a mask

Wearing masks has been proven to be highly effective in reducing the spread of COVID-19. Don't have a mask? Call the agency ahead of time and they will bring one for you.

Practice social distancing

Please remember to stay a safe distance (at least 6 feet) from workers while they are not providing hands-on care.

We appreciate your help!

Home care workers are authorized to leave the home if they believe the environment is unsafe. You can help keep the environment safe by wearing a mask! Failure on the part of clients and families to use masks may impact future care.

Keep us informed

If you or anyone in your household tests positive for the COVID-19 virus, please call your agency! Your caregivers can take extra precautions to provide the care you need safely!

The Home Care Alliance of Massachusetts, the Home Care Aide Council, and Mass Home Care are the three leading advocates for safe, affordable, and accessible home care services in Massachusetts.
