

Connect with Potential New Customers!

The **Manufacturing and Technology Resource Consortium (MTRC)** is partnering with **Scale for ClimateTech**, a manufacturing program supported by **NYSERDA**, to provide free match-making services between local NY manufacturers and climate tech companies.

As part of this effort, MTRC is building a directory of manufacturers interested in working with climate tech companies. Manufacturers that opt-in to this directory will be eligible to receive:

- **Free consultations to identify target customers**
- **Free marketing to the climate tech community**

[OPT-IN TO THE DIRECTORY HERE!](#)

Once you opt-in, you will be contacted for an introductory call with MTRC and Scale for ClimateTech to learn about your ideal target customers. **Find examples of climate tech products you could manufacture [here](#).**

If you have any questions, please feel free to reach out to the Scale for ClimateTech team, kris.licciardello@secondmuse.com
