

**In a time where air quality is
of utmost importance**

Stay Strobic Safe.

After Market Solutions

OEM Parts

We are the only source of OEM parts specifically designed for Strobic Air Technologies fan systems. From dampers and actuators to motors and fan sections, we have the solutions you need to extend the life of your fan system.

Smart System™ Controls

Our industry exclusive control package, The Smart System™, comes programmed from the factory with your specific fan systems optimum performance characteristics allowing the safest possible operation while consuming the least amount of energy. With updated algorithms, and the latest hardware and software, these systems can be retro-fitted onto existing Strobic Air Technologies fan systems for facilities and owners looking to maximize their energy savings.

Services

- ↑ Start up services for fan systems, VFD's and control packages
- ↑ Part installations
- ↑ Owner Training
- ↑ Preventative Maintenance Baseline Inspection
- ↑ Field Balancing
- ↑ We can tailor services to fit your needs

SAT

Preventative Maintenance & Extended Warranties

At seven years, the New Strobic Air Technologies Tri-Stack™ Systems carries the longest warranty in the industry, with an option to purchase a preventative maintenance plan at installation that would extend that warranty to an extraordinary 10 years!

Preventative Maintenance plans include yearly inspections where our certified factory trained technicians grease the motors as well as perform the original 40-point factory quality control inspection. These plans allow our owners the option to have a truly maintenance and worry-free ownership experience.
