

"Wheat Fields with Crows" - Vincent Van Gogh, July 1890

This landscape is another of Van Gogh's beautiful and most famous paintings. Look at the darkness of the sky above the fields. Look also at how he chose to color the sky, the fields, the bits of grass, and the dirt paths.

I hope that you were able to pick a spot to work on a landscape painting of your own, and that this week you can do the same.

Assignment: Using your paint set, please create another landscape in the same area as you did last week. Can we see any changes as spring approaches?
