

# FREE Developmental Screenings for Infants, Toddlers and Preschoolers living in Northwest ISD

## What is a Developmental Screening?

You and your child will meet with an NISD trained Screener to observe and discuss your child's development. We will specifically address your child's physical development, problem solving skills, communication skills and personal social skills. The screening results help you celebrate your child's growth and make goals to help your child reach their next milestones. Also, we can refer you to resources if further assessments are needed.

Additionally, we offer a Kindergarten Readiness Assessment for preschoolers (3.5 to 5 yrs). This is a wonderful tool that helps parents identify concepts their child knows and identify what concepts need to be worked on.
