

## **PMG Virtual Presentations**

Are you interested in sharing company info and job opportunities with your manufacturing students?

PMG is scheduling virtual presentations with technical schools and military bases across the nation. Our goal is to increase awareness about what we do, the job opportunities we have, and the growing demand for technical skills in manufacturing. We also want to position ourselves as a resource for individuals who have questions about the industry, particular job fields, selection processes, resume writing, interviewing, etc.

To date, PMG has virtually presented to over 30 trades programs across the nation including Welding, Industrial Maintenance, Machining, Diesel Technology and more!

### **How it Works?**

We work together to find a good date and time to present to your students.

PMG will send you a link to a Zoom meeting (Free - only need internet to access).

Login to Zoom meeting 5 minutes prior to scheduled time and we're all set to go!

PMG Industry Experts will give a live power-point presentation including company information, job opportunities, pay & benefits, resume and interviewing tips, and what's next in manufacturing.

Please expect a total time of about 30-45 minutes for the presentation and Q&A.
