

**CCP- To Note in September**

You should be nearing completion of your CCP learning plan. At this point in the practice year, review your learning plan, complete planned learning activities and record completed activities. In addition, plan time to evaluate and document the impact of the learning activities on your practice in the upcoming months prior to renewal.

Reminder that the completion of the *Mentoring and Supporting Learners* learning module is mandatory to renew your 2026 registration.

For guidance on accessing the CCP components, refer to the [Guide to the Continuous Competency Program \(CCP\)](#).
