How to be an Antiracist

by Ibrahim X. Kendi

Since the summer of 2020, many Americans have committed to understanding race and racism in our history and current institutions. Many may have already read this book. We are going back to it to revisit the major concepts, ideas, and history in order to form a basis for some of the books we will read going forward.

Come read this in community even if you have already read it.

Learn from each other and discuss how we can sustain our commitment to antiracism in society and in our professional and personal lives.
