VBS RECAP

Vacation Bible School was an absolute blast of a success this year! Typically, we buy a themed curriculum online for us to use throughout the week, but this year our leadership team worked together to write our very own curriculum themed around Dr. Seuss' classics. Our team spent hours working together to parallel the books written by Dr. Seuss along with several teachings of Jesus Christ. It was a fun-filled week with 65 kids, 35 teenage crew leaders, and 20 adult volunteers! These types of events are truly a team effort from everyone within the church including the donations by church members, adult volunteers, and of course the families with all of the cute little faces! We feel truly blessed and fortunate to have such a strong community of faithful people to help with such a fun summer camp.

As thankful as we are for the community of CUC, we are also incredibly thankful to have such a facility to host this type of summer camp for our little ones! With such a large sanctuary and kitchen area, it makes for an easy gathering of over 100 people. It is also extremely important to have the classroom space we do in the basement to separate into our smaller activities such as crafts and bible stories. These classrooms help us separate the energy of the students as well as keep a steady flow of movement from one activity to the next. The outdoor space is equally as important as the indoor space. We hosted a variety of games on the fields of Wilder Elementary School. From water balloon toss to games of soccer, we are grateful for our partnership with this elementary school. All of this gratitude being said, it is highly important that we keep up to date with maintenance and renovations on such a large space. Your contributions to our building renovation play a key role in the life of our children and youth ministries. Thank you in advance for all of your investments and contributions to keeping this building in shape and running so we can continue to host such incredible summer camps for our kiddos!
