YOUTH
CONSERVATION
CORPS

PROGRAM INITIATIVES

Engage your interests to:

- conserve and sustainably manage our forests
- receive wages as you learn
- determine future outcomes in our forests

While learning about:

- soil, carbon sequestration, and water quality
- wildlife habitat
- quality crop trees
- biodiversity and structural diversity

Take your VYCC experience and credits to Vermont Tech for an AAS in Forestry with a bridge program to UVM to receive a BS in Forestry or related environmental field.

You can also use our training to gain immediate access to employers and return to a degree program at a later time.

What are we
trying to
solve/support

Forestry 101 Curriculum: Inspire and engage an emerging skilled workforce and foster community awareness through local education systems.

Work Crews: Engage and train a skilled workforce while improving forest health for a more viable forest and wood products industry.

Outreach: Collaborate to bring awareness that the forest of the Northeast is an important ecosystem and natural resource.

* Support rural communities to be innovative, sustainable and working.

The Results

“During my time at VTC, I was offered a job by one of my professors. I currently have a job with a consulting Forester, and once I am done with school, I will work for him full-time and then get my Foresters License. I also do tree removal, sugaring, welding, small engine repair, and some work for my father on the side. I am currently employed as a Forestry Technician for New England Forestry Consultants.”

Forestry program at VTC (Fall 2019)- 17 students

VYCC work crews (this summer)- 10 participants

Acreage managed- 60 acres
