

Mable offers grocery stores, health food stores and food service businesses an easy-to-use web & mobile ordering platform.

We make it simple for stores to order directly from brands, and we can add any distributors that retailers use onto Mable. Mable also recently launched a mobile app that makes restocking shelves even easier. Buyers can either scan a barcode or do a quick search to create an order that is sent off to suppliers and distributors in nicely formatted PO. No more emails, phone calls and texts. Mable has over 200 brands, and growing, on the platform.

Here is a sampling of some from Vermont:
