2023 Annual meeting of the NIEHS
Superfund Research Program (SRP)
– Albuquerque, NM

December 4-6th, 2023. Hotel Albuquerque

The 2023 Annual NIEHS Superfund Research Program meeting is being held at Hotel Albuquerque this year on Dec 4th, 5th & 6th. Over 550 attendees have registered from across the country.

At the Annual meeting of the NIEHS Superfund Research Program (SRP), grant recipients and trainees (i.e., graduate students and Post-Doctoral Fellows) will provide research progress updates of their SRP-supported environmental health research. **This year's meeting theme explores how utilizing team science can accelerate scientific discovery and solutions for those impacted by hazardous substances, with a special focus on engaging Indigenous Scientists and Community Members.**

The following universities are SRP grant recipients that are required to send center directors and several researchers from a variety of disciplines (engineering, health sciences, biology, remedial technology, data management modeling and analysis to name a few) to the annual meeting in Albuquerque, NM. In addition, NIEHS leadership and federal/state/local government and community stakeholders will also be in attendance.

- **Baylor College of Medicine**
- **Columbia University**
- **Duke University**
- **Harvard School of Public Health**
- **Louisiana State University**
- **Massachusetts Institute of Technology**
- **Michigan State University**
- **North Carolina State University**
- **Northeastern University**
- **Oregon State University**
- **Texas A&M University**
- **University of Alabama at Birmingham**
- **University of Arizona**
- **University of California-Berkeley**
- **University of California-Davis**
- **University of California-San Diego**
- **University of Iowa**
- **University of Kentucky**
- **University of Louisville**
- **University of New Mexico**
- **University of North Carolina-Chapel Hill**
- **University of Rhode Island**
- **Wayne State University**
- **Yale University**

Grant recipients will share research aimed at finding ways to protect communities from exposure to hazardous substances such as chemicals, solvents, and metals found in contaminated water, soil, and air. These teams study environmental contaminants in order to lower environmental cleanup costs, reduce human exposure, and improve human health. SRP's central goal is to understand and break the link between chemical exposure and disease.
